

# CHOOSE YOUR ENGINE

You can choose from a range of diesel engines, petrol engines and the innovative PHEV engine. All have Stop/Start technology, feature lightweight aluminium construction, produce lower emissions, better fuel consumption and effortless power.

## DRIVELINE, ENGINE PERFORMANCE AND FUEL ECONOMY

Class B (19"-22" wheels with All-Season Tyres) Class C (20"-22" wheels with Summer Tyres)

\*Only available on Dynamic Pack models. \*\*When combined with electric motor. †Without active roll control fitted. ††Only available on 5 seat Dynamic Pack models.

<sup>1</sup>The figures provided are NEDC2 calculated from official manufacturer's WLTP tests in accordance with EU legislation. For comparison purposes only. Real world figures may differ. CO<sub>2</sub> and fuel economy figures may vary according to wheel fitment and optional extras fitted. NEDC2 are figures calculated using a Government formula from WLTP figures equivalent to what they would have been under the old NEDC test. The correct tax treatment can then be applied. <sup>2</sup>WLTP is the new official EU test used to calculate standardised fuel consumption and CO<sub>2</sub> figures for passenger cars. It measures fuel, energy consumption, range and emissions. This is designed to provide figures closer to real-world driving behaviour. It tests vehicles with optional equipment and with a more demanding test procedure and driving profile.

The fuel economy of the P400e will vary significantly dependent on the journey length between charges from an external source. For city commuting and short journeys starting with a fully charged battery and used within its EV range, the P400e will require almost no fuel. For longer journeys, and journeys starting without a fully charged battery, fuel consumption is up to 10,9l/100km with a range of up to 720 kilometres.
